Kuldeep Jain
M.D.
BJAIN Group of Companies

Dear Doctors,

BJAIN Group has been serving homeopathy for more than 50 years. It was started with a small publishing house in 1966 to serve passionate practitioners, ambitious students & admirers of homeopathy around the world. It publishes books & homoeopathic journals, conducts seminars and workshops for students & doctors to exchange their ideas and experiences and is committed to the promotion of Homeopathy across the globe.

After serving homeopathy in terms of printing, I was not contented as a large sector of Indian Homoeopaths still relied on medicines which were not manufactured in their own country. I strived to find the reason behind this. After having multiple conversations with a plethora of doctors, I came to a conclusion that there is a need for quality medicines in Homoeopathy.

To achieve this, we needed a dedicated team, appropriate infrastructure, best available raw material and transparency in production processes to carry out all the related procedures. This led to the foundation of BJAIN Pharmaceuticals in 2010. Today BJAIN Pharmaceuticals is known for manufacturing one of the finest quality of homeopathic medicines across the world.

In 2010, Bjain was the first Homoeopathic Pharmaceutical company in Asia to invest in the development and procurement of the most advanced and accurate Potentization machine from Europe, which makes potencies with highest precision. Our goal is to reach to the masses by maintaining quality and accuracy of product.

Quality of raw materials, processes and end products is strictly ensured at BJAIN. We procure our raw materials from original sources of cultivation or from reliable vendors. All raw materials are tested against various parameters before their entry into the plant. Special emphasis is laid on cleanliness-maintaining ISO class 7 and class 8 environment, having cleanrooms with HEPA filters and HVAC system in each section, in house DM water plant and UV filtration with 24-hour circulation to ensure zero microbial growth are some of the steps taken for the same.

Our perseverance in quality manufacturing has bagged cGMP with the most updated requirements by International FDA. Our wide range of products that are available all over the globe include Mother Tinctures, Liquid Dilutions, LM Potencies, Schuessler Salts-Biochemic & Biocombination Remedies, Trituration & 1x Tablets, Lactose, Globules, Specialty Products, Personal Care Products and Remedy Kits.

We express our sincere gratitude to valued patients and learned doctors in addition to dealers who perform a wonderful task in conveying our objectives to the lovers of Homoeopathy.

Service in Homoeopathy is our passion and we are proud to be a significant part of the flourishing Homoeopathic community.

To find out more about our products & their preparation you can visit: www.bjainpharma.com.

CERTIFICATIONS

Certifications are a mark of acceptance and milestones achieved while treading on the path of Quality deliverance in any field. BJAIN Pharmaceuticals is proud to announce that we have successfully achieved GMP certifications from Indian regulatory. BJAIN Pharmaceuticals is determined to take Indian Homoeopathy all across the globe with consistent hard work and adherence to quality deliverance.

GMP CERTIFIED

Good Manufacturing Practice (GMP) is a term that is recognized worldwide for the control and management of manufacturing, testing and overall quality control of pharmaceutical products. GMP highlights upon documentation, record keeping, personnel qualifications, sanitation, cleanliness, equipment verification, process validation, and complaint handling. GMP certification is a mark of sincerity in providing quality medicines and ensures that products are consistently produced under controlled environment according to quality standards. We are certified for the same and in fact implement cGMP or current GMP guidelines in practice which are updated regularly.

Certified

OUR STRENGTHS

QUALITY ASSURANCE

Quality Assurance validates all processes starting from receiving raw material, testing procedures, equipment & instrument, and their release. QA also ensures that GMP guidelines are diligently followed and record keeping of all processes is in place entitling trust and transparency to the organization.

Visual Inspection

QUALITY CONTROL

BJAIN Pharmaceuticals has a well-equipped quality control department which has an experienced team of chemists, botanists and expert technicians. The QC department is outfitted with the most advanced machinery and equipment for testing the raw material and the finished product at various stages.

Raw material

All herbs and raw materials go through standardization tests. Well laid out procedures for herb testing include studying organoleptic features, macroscopic & microscopic testing, TLC and UV.

These tests help the department to identify any spurious ingredient precisely. All the raw material is tested and approved prior to use in production.

In process Quality Control (IPQC)

In-process controls play an especially important role in ensuring the consistent quality of products. Tests that are crucial for quality control but that cannot be carried out on the finished product shall be performed at an the appropriate stage of production. This leads to cross-checking at each step and verification of correct SOPs being followed hence leaving nothing to chance.

Finished Products

- The QC department conducts test on sample of all batches of finished products as per accepted parameters, specifications & microbiological testing. Only after the QC approval the product is released for dispatch.

Total solids in finished MT

Disintegration Time

MICROBIOLOGY

Microbiology Department ensures control of the bioburden through adequate cleaning and appropriate storage of equipment. This leads to sterilization at each step of production.

RESEARCH & DEVELOPMENT

The R&D Department at BJAIN Pharmaceuticals is one of the pillars for the quality, safety and consistency we stand by.

All the remedies which BJAIN adds to the list every year are prepared from herbs and chemicals procured from authentic sources. All herbs are resourced from their indigenous habitats, nosodes and sarcodes are also acquired from reliable sources.

New Product Development

Each time a new product is developed there is an extensive research done prior to it. Thereafter sample product development is done at our formulation lab which are then sent for testing, once that is approved products are put under stability test.

Only when an accelerated stability report is cleared products are launched in the market.

Each product of B. Jain is tried and tested which makes it efficacious and safe.

All teams are complimented by highly qualified professionals with thorough experience in their fields.

MOTHER TINCTURE

BJAIN Pharmaceuticals emphasize on quality of Mother Tinctures because they are the foundation in the manufacturing of all Homoeopathic products. The quality of medicine not only empowers the physician but also strengthens the patient's faith in Homeopathy.

Raw material

- The raw material is obtained from original source of cultivation and from reliable vendors.
- Herbs and chemicals are strictly tested as per the standards laid by HPI, HPUS, or GHP whichever is applicable.
- BJAIN uses highest grade of alcohol, grain based ENA as a vehicle in the preparation of Mother Tinctures.

Process

The manufacturing requires precise operations

Step-1: Maceration/Percolation

The process of maceration/percolation is done as per pharmacopoeia guidelines or Hahnemannian procedure. Use of 316 grade SS (highest quality stainless steel) containers are used for all steps.

Step-2: Hydraulic Press

The resultant is pressed through the hydraulic press machine to extract maximum medicament in the tincture.

Step-3: Filtration

Under gravity, filtration is done by using Whatman membrane Filter paper.

Step-4: Ageing

The highlight of BJAIN MT is the Ageing process to ascertain maximum dissolution of drug substance into the menstrum (alcohol), removing all sediments thus releasing all medicament quality into the alcohol giving a pure and clear MT.

Step-5: Second level Filtration

Step-6: QC Testing

All MT undergo tests and analysis as per specifications laid out in standard. Once tincture is cleared and passes all criterion of testing it is released for dispatch.

To ensure the consistency and assurance of procedures carried out, all steps at each level of production are documented and checked by QA.

LIQUID DILUTIONS (POTENTISED MEDICINES)

Dilutions are the back bone of Homoeopathy and BJAIN Pharmaceuticals understands that it is a great matter of trust and transparency.

This is why all potencies are made from their self-produced back potencies with records of the original mother tinctures along with their raw material available at hand. One of the best potentization machines is used for this that avoids manual errors by maintaining 99% calibration accuracy with consistent strokes of equal force each time.

For raw material of Nosodes and Sarcodes, back potencies are procured from reliable sources with certifications.

Documentation

All steps of potency preparation from raising back potency to final potency, labeling and packaging are documented in great detail.

Range, Stocking and Packaging

- We maintain stock of fast moving dilutions for quicker processing.
- For medicines which are less in demand, back potencies are kept ready at all times and high potencies are made on order in minimum time.

Packing Material

- Amber coloured bottles of the best quality are used for maintaining the purity of medicines. These bottles are cleaned at three levels of washing and dried prior to use to ensure they are free from all impurities.

TABLETS

Trituration in the tablet section follows the detailed and accurate Hahnemanian method, according to which, one part of medicine is mixed with 9 parts of lactose and then triturated in 3 sets of 20 minutes each and strict vigilance over the Raw Materials being used for each remedy. The first samples of every batch are tested for friability, DT and weight variation.

Raw Material:

- The base of lactose used is HMS grade lactose. It is the finest lactose and considered as best in the world.
- All salts and raw material (medicament) used are procured from approved vendors and chemical manufacturers of highest quality. It is ensured that the correct raw and medicinal material is used for all tablets.

Process and Technique:

- The complete batch of 1 hour trituration is carried out for all tablets made at BJAIN
- The mortar and pestle equipment used is made of porcelain as was available at the time of Hahnemann.
- Each step is carried out and validated by intricately documented procedures.

Quality control:

- All in process powders and final tablets are tested as per laid out standards and specifications at the QC Lab.
- They are released after clearing the testing for all physical, chemical and microbiological standard tests.

Special Features:

- We manufacture Soft dissolving tablets with Dissolution time of 10 -20 seconds for all biochemical salts.

HMS Lactose

Trituration in automated Mortar Pestle

Final tablets from Hi-tech Cadmach Machine

GLOBULES

Globules or Sugar pellets are the most commonly used Homoeopathic vehicle and hence their being pious is of utmost importance, this is why we cautiously conduct the Fehling Test and Microbiological tests on each batch.

MADE FROM PHARMACEUTICAL GRADE SUGAR

Features:

- Made from pharmaceutical grade sugar
- Assures Homogenous impregnation of medicines
- Quality tests done for all batches
- Manufacturing jars of SS316 grade stainless steel
- Made in GMP certified environment

Sizes Available : 3mm, 4mm

Types Available: Hard Globules (pharma grade sugar)

Pack Size: 450g, 1kg & 25kg

Made To Order (minimum order quantity- 250kgs)

Sizes in No.: 10,20,30,40,50.

Types : Soft /Hard globules(pharma grade sugar) or (sugar + lactose)

BLANKETTES

MADE FROM PUREST QUALITY HMS LACTOSE

Features:

- HMS grade Lactose
- Optimal preparation method which assures fast dissolution in mouth (10-15 seconds)
- Tablet size – 100mg, 250mg

Pack Sizes available: 1 kg

WAREHOUSE/STORE

With an entire floor for the Warehouse, there is adequate space with highest security standards & constant information sharing. Each Staff member has insight into the smallest components which determines the quality and efficiency of warehouse management.

Store is clean and uncluttered, having temperature and humidity control, enforcement of stock rotation, adequacy of shelving as well as quarantine area for recalled/expired medicines.

GMP norms of FEFO and FIFO are also followed effectively to optimize production and ensure best quality.

BARCODE and QR Code on all our Finished Goods ensures Traceability of each batch. This also avoids duplication of products in the market.

Pack sizes available: 25g & 450g

LM POTENCY

LM Potency

- Dr. Hahnemann discovered a new potency between 1837-1842, in Paris and named it as
 - o Renewed Dynamization – Aphorism 161
 - o New Altered but Perfected Method – Aphorism 246 footnote
- Master Hahnemann designated as 0/1, 0/2...0/30
- The numerator '0' represents poppy sized globule which is used in every potentisation.¹
- Dr. Pierre Schindt of Geneva gave this new scale another name – 50 Millisemal Potency/Scale

Preparation of LM Potency at B.Jain Pharmaceuticals

- 1grain of drug substance + 100 grains of sugar of milk $\xrightarrow{\text{Trituration for 1hour}}$ 1st trituration
- 1grain of 1st trituration + 100 grains of sugar of milk $\xrightarrow{\text{Trituration for 1hour}}$ 2nd trituration
- 1grain of 2nd trituration + 100 grains of sugar of milk $\xrightarrow{\text{Trituration for 1hour}}$ 3rd trituration
- 1grain of 3rd trituration + 100 drops of dispensing alcohol + 400drops of purified water
 \downarrow
Mother tincture of LM Potency
- 1drop of MT + 100 drops of pure alcohol $\xrightarrow{100 \text{ succussions}}$ 0/1
- 100 globules are taken and moistened with 1drop of the 0/1 potency and then dried on a blotting paper \longrightarrow 0/1 potency in globules
- 1globule of previous potency dissolved in a drop of water $\xrightarrow{100 \text{ drops of alcohol} + 100 \text{ succussions}}$ 0/2

Why B.Jain LM?

- Assurance of Correct Raw Material
- Grain Based ENA used
- Pharma grade globules used – Most Accurate Vehicle
- Following complete Hahnemannian method to offer most accurate LM Potency
- Available in sealed packing of 6gm – Assuring hygiene/confirming correct material.

Pack Size Available: 6gm
